WINEMAKING
This wine was made exclusively from red grape varieties grown in the Vinho Verde region. Gentle crushing and pressing give a slightly pink juice, which is allowed to settle until it has the desired degree of clarity. The juice then ferments alone, without the skins, as for a white wine, at a controlled temperature of 14°C-16°C.

MATURATION
After fermentation, the wine is aged for approximately two months in tank before it is ready to be bottled. Before bottling it is fined, cold treated and sterile filtered.

STORE
Gazela must be kept upright, in a dry and cool place. Given its freshness, Gazela is a wine that is best drunk young

SERVE
Should be served well chilled, in a white wine glass or a flute, at a temperature between 6°C-8°C.

ENJOY
Gazela is ideal as an aperitif, with salads, fish, seafood dishes and Asiatic cuisine or sushi
